

Analysis of Physical Status, Functionality, Density, Functionality and Space.

Physical Status

Physical status of the health facility (i.e. building structure, floors, furniture and plants)

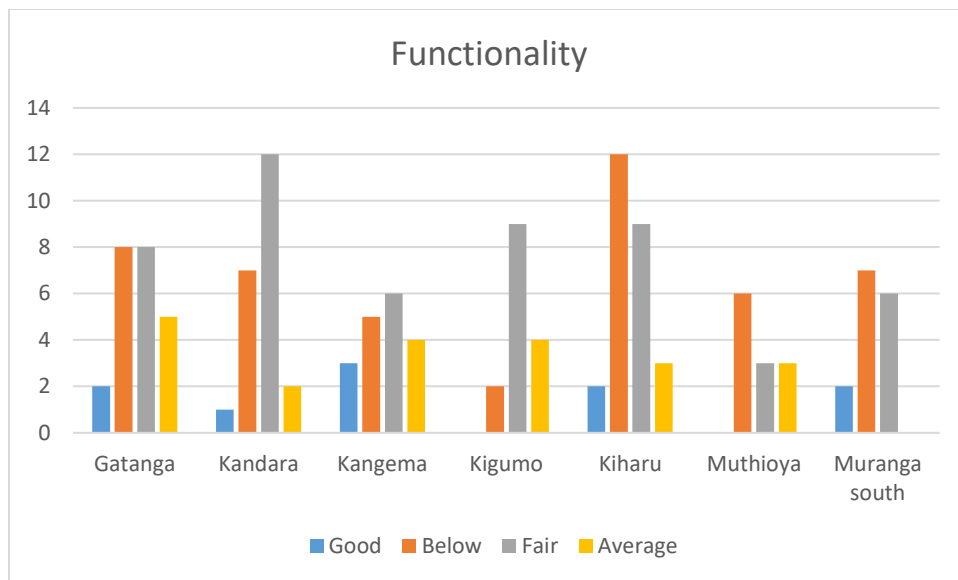

Density (Total Number) of HCFS in Each Sub County

Functionality

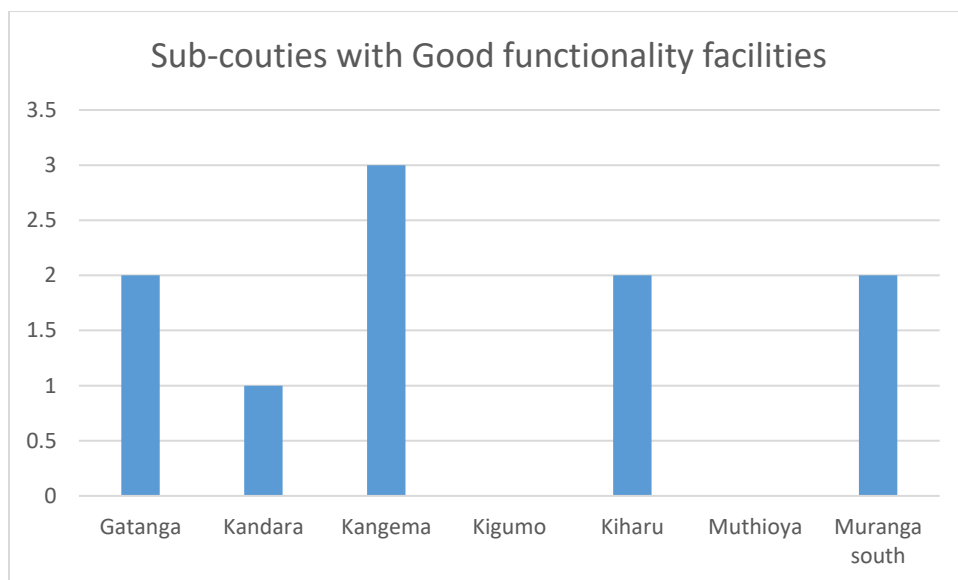

Whether the facilities are offering the basic minimum health services as prescribed by national GoK policy & guidelines for various categories of health facilities.

Only 8 healthcare facilities out of 131 have the “Good” functionality

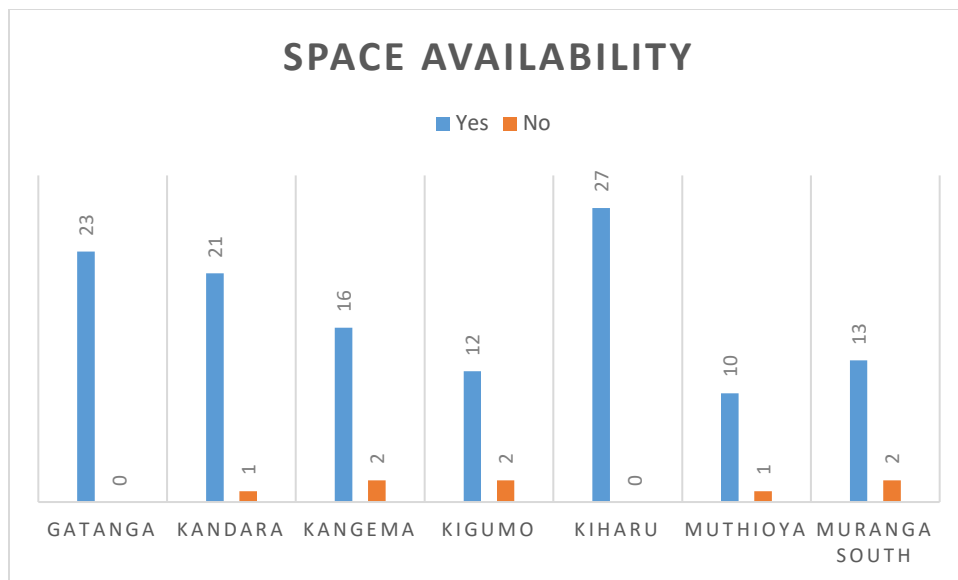

Of the 8 facilities with Good functionality, 4 are Health Centers and 4 are Sub-district level hospitals

There is no facility in Kigumo and Mathioya that have Good functionality.
